STATE OF VERMONT
ENVIRONMENTAL BOARD
MONTPELIER, VERMONT 05602
802-828-3309

DATE: June 26, 1990

TO: Parties

FROM: Stephen Reynes, Chairman

RE: Sigda Lumber, Inc.,
Land Use Permit **#2W0749-EB** (Revocation)

Enclosed is a copy of the final decision of the Environmental Board in the above matter. The decision revokes the permit for violations with respect to installation of culverts, filling of wetlands, and lighting, unless the violations are corrected. The decision also finds that the Permittee is not in violation with regard to project **signage,** maintenance of a zone of undisturbed vegetation, and construction of a sound barrier.

Prior to the issuance of the final decision, the Permittee filed an affidavit on May 25, 1990 stating that the violations have been corrected. The proposed decision, issued April 27, 1990, stated that such an affidavit would be required, and that parties could file comments on it within three weeks of the date it was postmarked. The Board's final decision retains this provision.

The Board received no responses to this affidavit within the period prescribed by the proposed decision. However, because the **Permittee's** affidavit does not contain great detail, the Agency of Natural Resources is specifically requested to file a written response to the affidavit concerning whether the violations with respect to culverts and filling of wetlands have been corrected. This filing must be made within three weeks of the date of this memorandum.
