March 10, 1971

IT IS HEREBY DECLARED that a policy of the Vermont Environmental Board will be to allow any subdivider of land who was exempt under the requirement of obtaining a permit under Section 7 of Act 250 and is desirous of improving his subdivision, and any subdivider who has obtained a permit under the provisions of Act 250 but is also desirous of improving his subdivision may apply to the appropriate District Environmental Commissions for consideration of obtaining a permit for his subdivision or a new permit, if applicable.

In all such cases, should the District Environmental Commissions or the Environmental Board deny said permit, the subdivider will not be penalized and his previous subdivision plan will be allowed to stand.

The normal \$5 per lot fee will apply, in these cases, only to those lots which are changed.

adopted unanimously 3/10/71
