I would like to know how a multiple offender keeps getting away with this with such little fines and continues to operate outside of his permits. With tax payers being the ones that pay the price. What is the point of act 250 why do we pay people to sit in a office that do not do there jobs keep allowing people to work outside of there permits and keep turning a blind eye to this behavior. The whole structure is a joke with the state saying how “green” they are and care about the water and air quality. Why do people even apply for permits if you are not going to enforce them all we keep hearing is how they are short staffed but every time you call they are always on vacation. This is a whole neighborhood that is being effected by this and it blows my mind that it takes so long to get anywhere. The state should be ashamed of it self if this was in the governors or act 250 peoples front lawns it would of been taken care of before it started. The fine should of been 1100 dollars per neighboring property owner that was not notified. But once again instead of promoting new local business we keep letting the ones that break the rules run free with zero care for the tax payers or the environment great job.
