PROJECT DESCRIPTION
Crowley has received an EPA grant to build a side-streaming capability for their whey. Construct a draining system to divert whey from cheesemaking with new piping to a bulk tank to be cooled; building the plumbing that will allow pig farmers to access the cooled whey to take for pigs; building the plumbing to integrate the cooling system with an existing, and otherwise unused insulated (but not refrigerated) 3,000 gallon bulk tank; and creating access to the 3,000 gallon bulk tank so that accumulated whey can be pumped to a tanker and hauled away.
